Mario Bellini, Milan | die developer Projektentwicklung GmbH, Düsseldorf

Façade in the public eye

The anthracite-coloured ceramic cladding sheets of the seven-storey high building are illuminated from the nadir of the façade. In addition, apart from the initially planned warm white, the client asked to be able to use other light colours to suit different events

The LED-WallWashers were recessed into TTC stainless steel drainage channels and covered with linear TTC aluminium grids.

DRAINLIGHT [LED + CHANNEL + GRID]
Exterior

Products

- TTC Drainlight [LED + channel + grid]
- LED-WallWasher, warm white + RGB
- TTC Stainless steel drainage channels
- Linear KSF aluminium grids

Features

- Light colours dimmable and controllable using DMX

.....

DRAINLIGHT [LED + CHANNEL + GRID]
LED-WallWasher | Light colours dimmable and controllable with DMX

.....

Façade illumination

The type 1200-36 and type 600-18 LED-WallWashers were installed in approx. 200 m of TTC Drainlights with stainless steel façade drainage channels having a width of 200 mm, which had been installed around the building. The WallWashers can be individually adjusted to meet the varying slopes of the façade.

A TTC KSF linear aluminium grating with a bar spacing of 15 mm was chosen to cover the channels.

The light colours are dimmable and controllable using DMX.

DRAINLIGHT [LED + CHANNEL + GRID]

LED WallWasher | Stainless steel façade drainage channel | aluminium grating KSF

.....

Drainlight [LED + channel + grid]

LED WallWasher

- 144 units 120 cm each | 36 LEDs
- 44 units 60 cm each | 18 LEDs
- Light colours: warm white + RGB
- Protection class: IP65

TTC Façade drainage channel

- Approx. 200 metres façade drainage channels made of stainless steel
- Width 200 mm

TTC KSF linear comb grating

- Approx. 200 metres aluminium gratings
- 15 mm bar spacing
